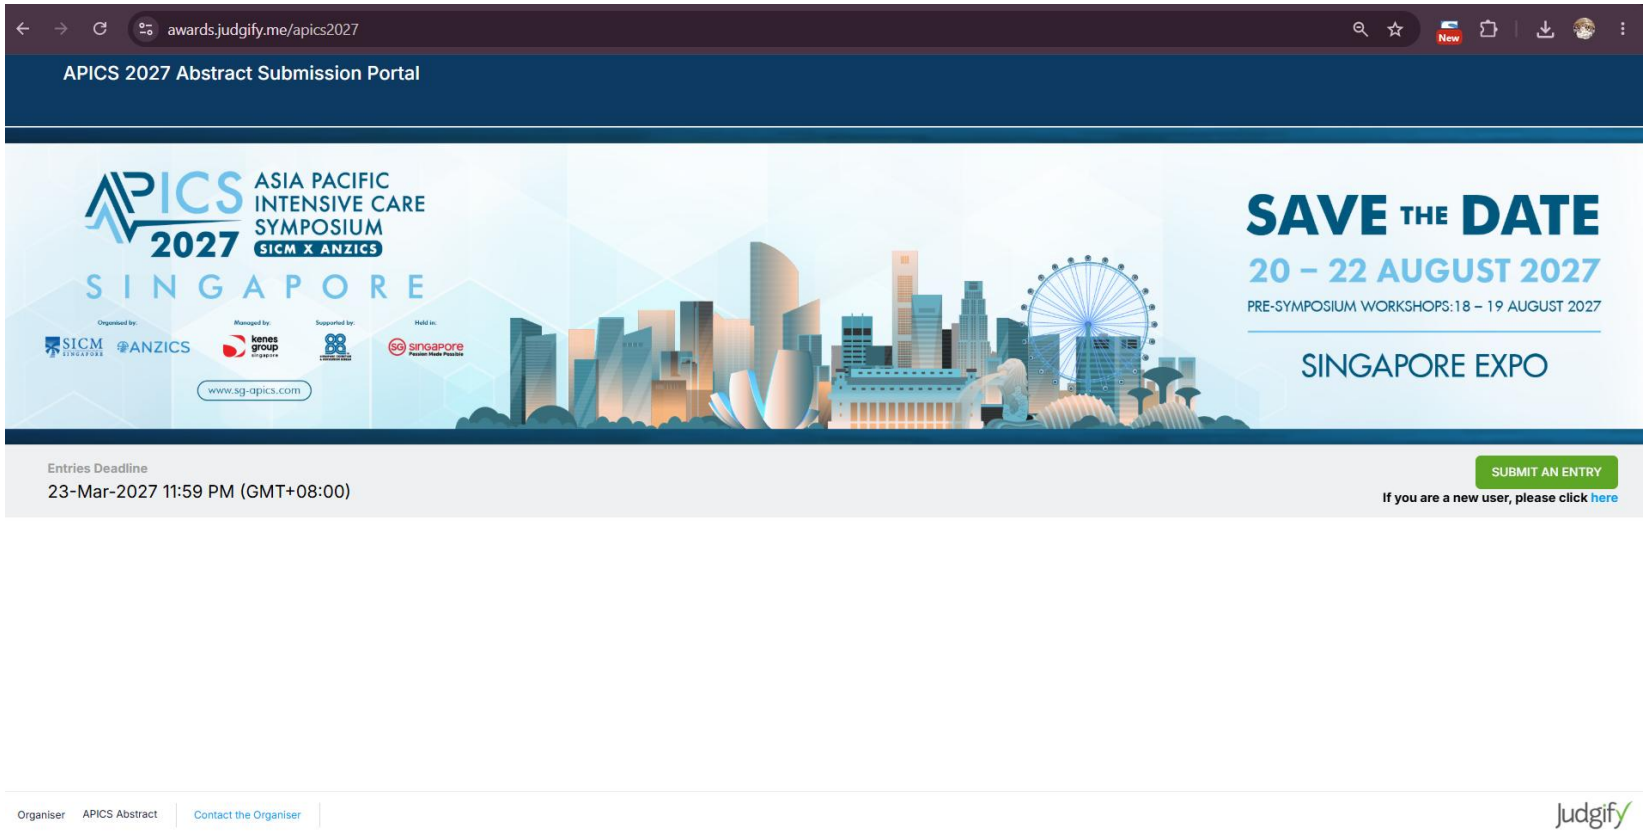
Abstract Submission Portal

Landing Page



[Click here to access the portal]

Abstract Submission Opens

16 November 2026

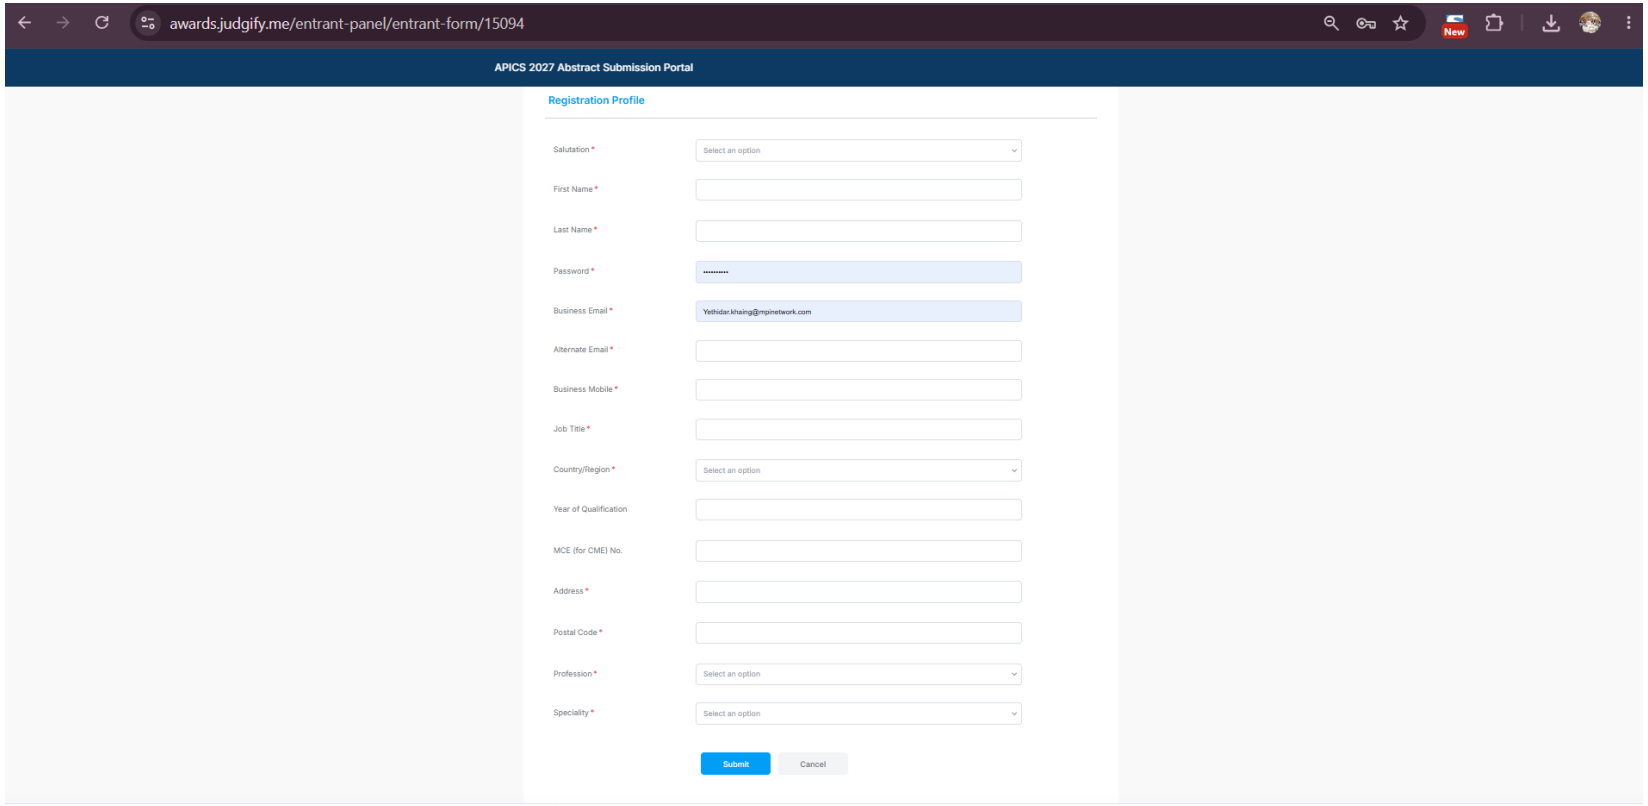
Abstract Submission Deadline

23 March 2027, 11:59 PM (GMT+8)

Please note that past submitters who already have an existing account can simply log in to the portal using their previous credentials.

If you have previously saved the portal link and login credentials in your browser, you may be logged in automatically when accessing the portal again.

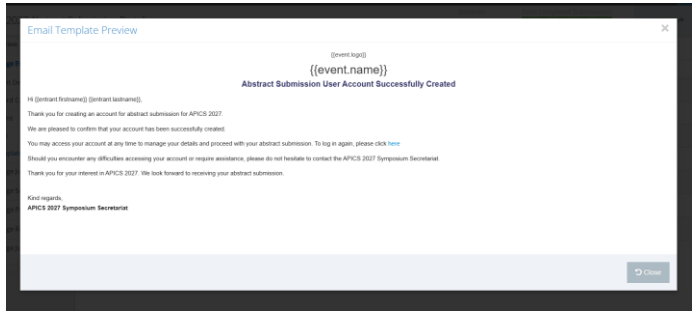
For New Users



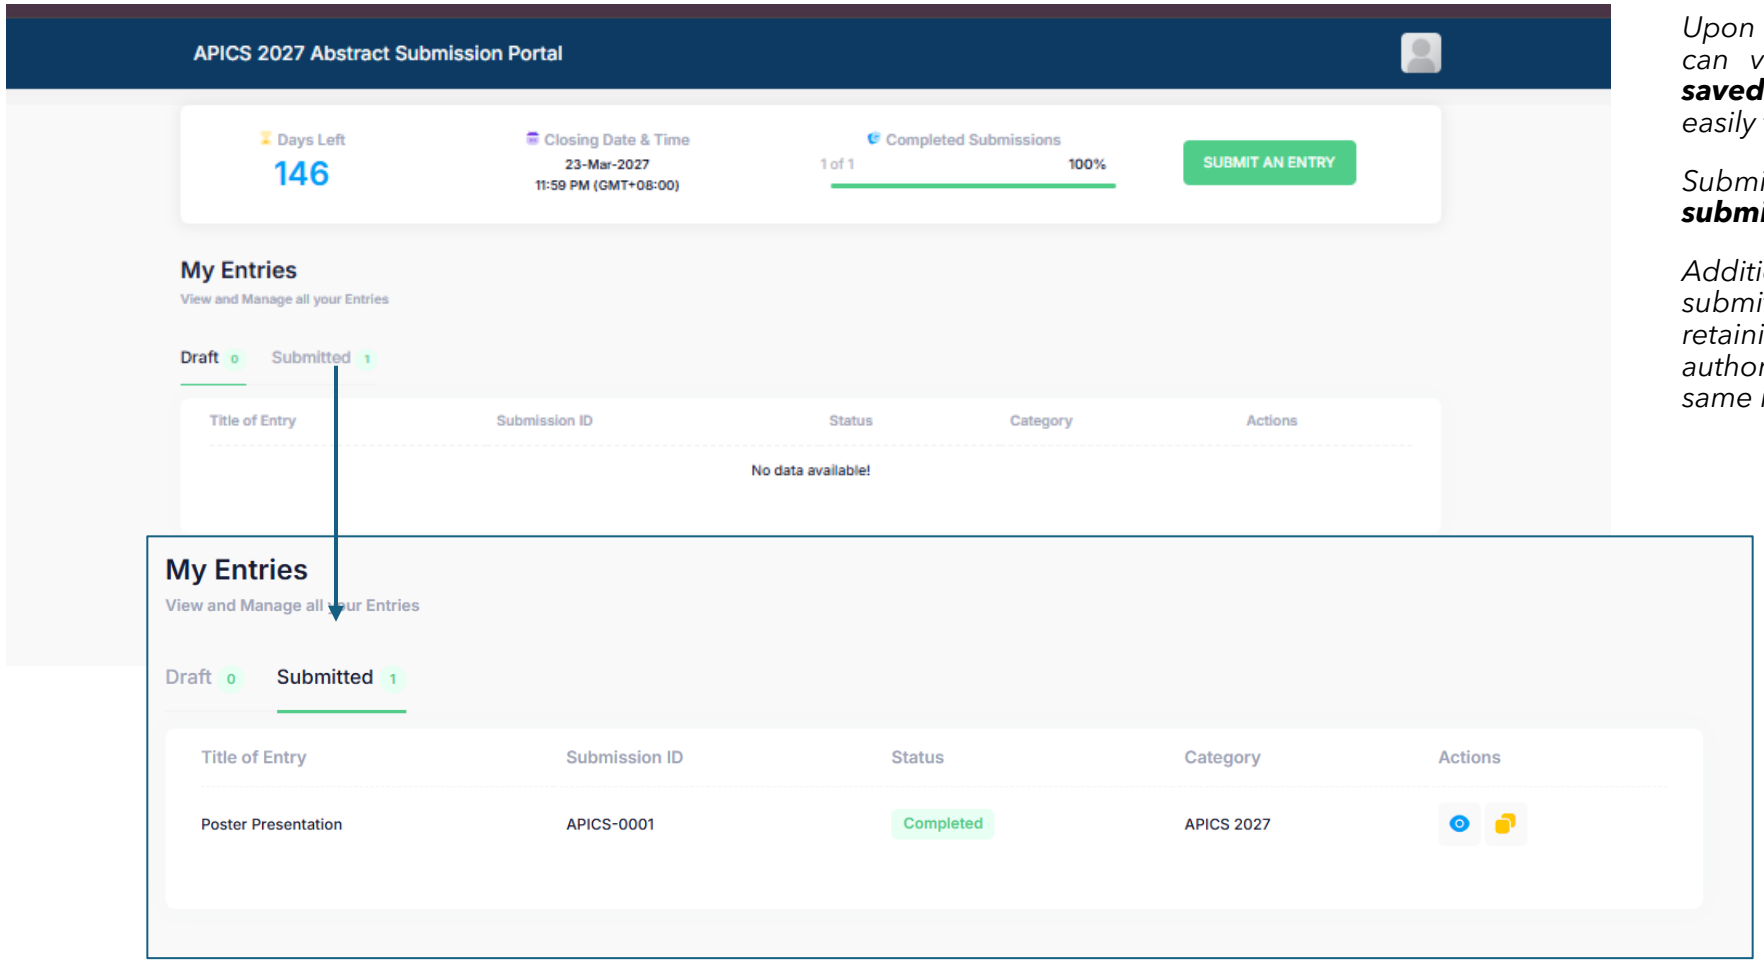
For new users, you would need to create an account by simply following the registration instructions (see below) provided on the portal's landing page.

[If you are a new user, please click here]

Once you have successfully created the account, you will receive a confirmation email containing your login credentials for future access to the portal.



Old Users/Homepage of the Portal

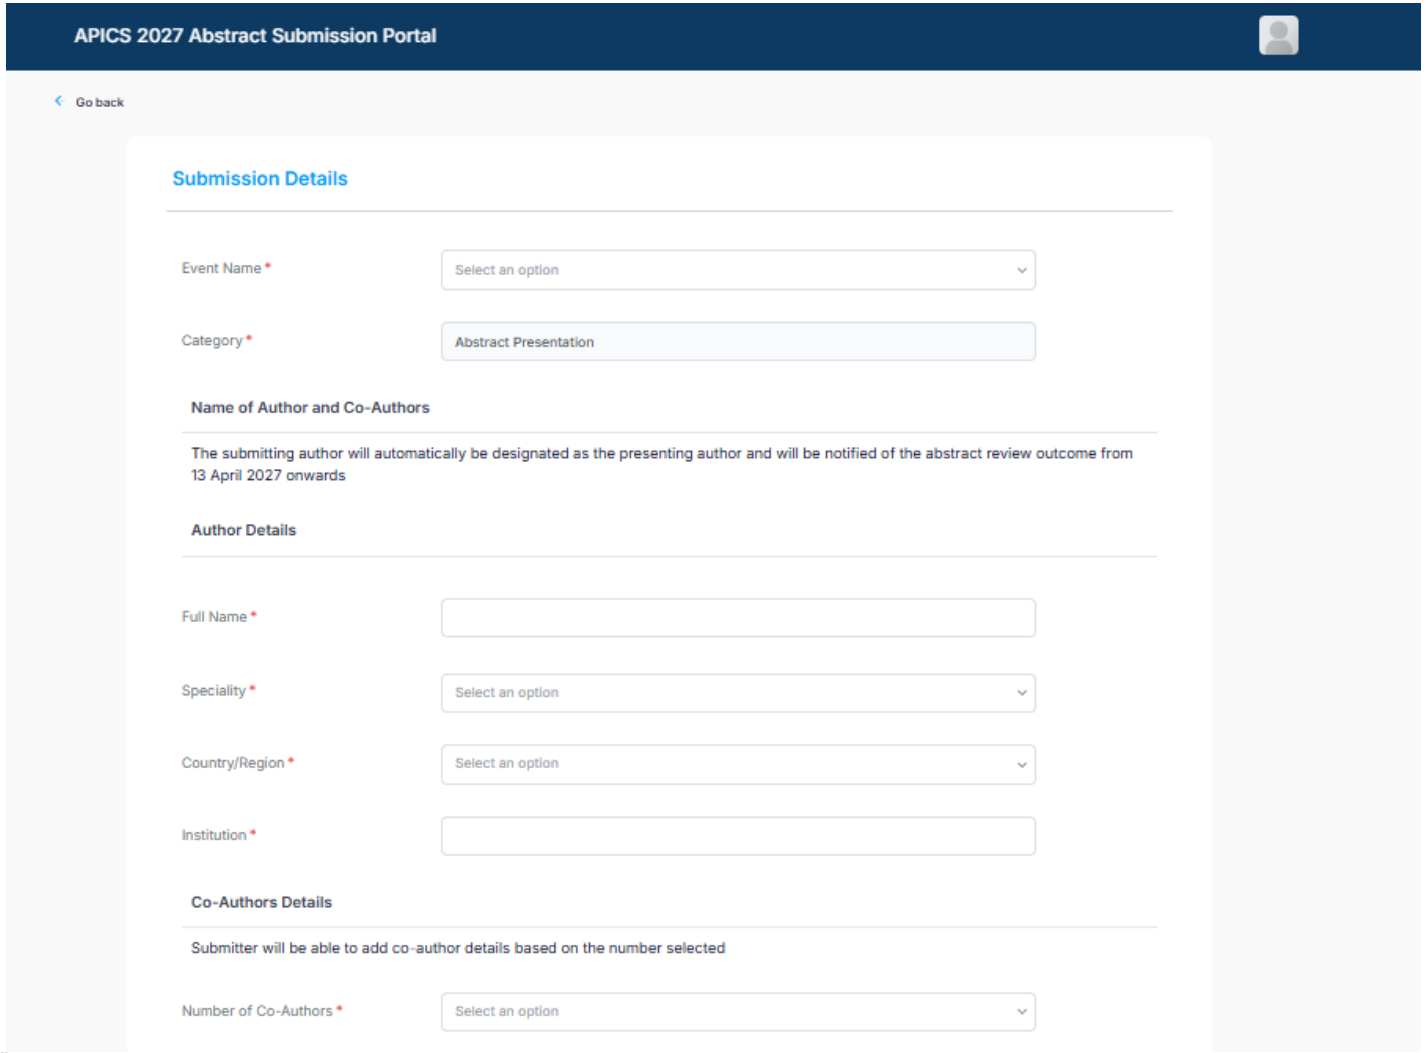


*Upon logging back into the portal, submitters can view all your **submitted abstracts and saved drafts** on the homepage, allowing you to easily track and manage your entries.*

*Submitters can also **view and print the submitted abstracts** at any time for reference.*

*Additionally, the **Clone** function allows submitters to duplicate an existing entry, retaining previously entered information, such as author details, without having to re-enter the same information for a new submission.*

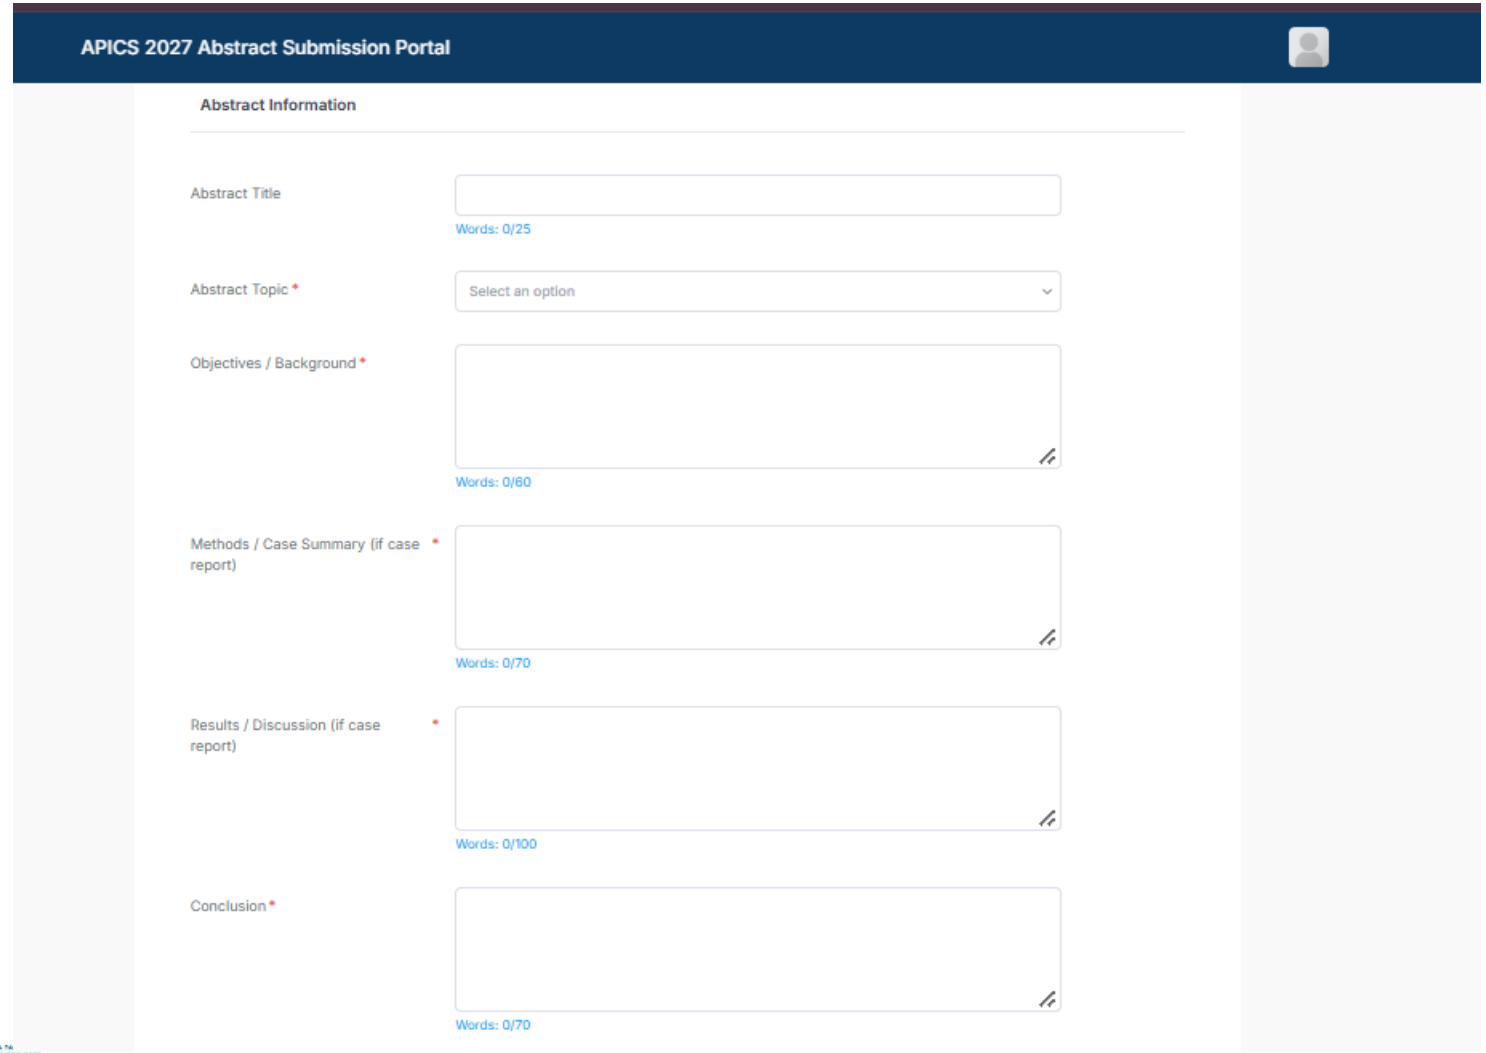
To Submit An Abstract



For both new and existing users, once logged in to the portal, you can select "Submit an entry", which will direct you to the abstract submission page.

Users are required to first complete the Author Details section, including the information of the presenting author and any co-authors (Up to 10), before proceeding with the abstract submission.

Submitting the Abstract Information



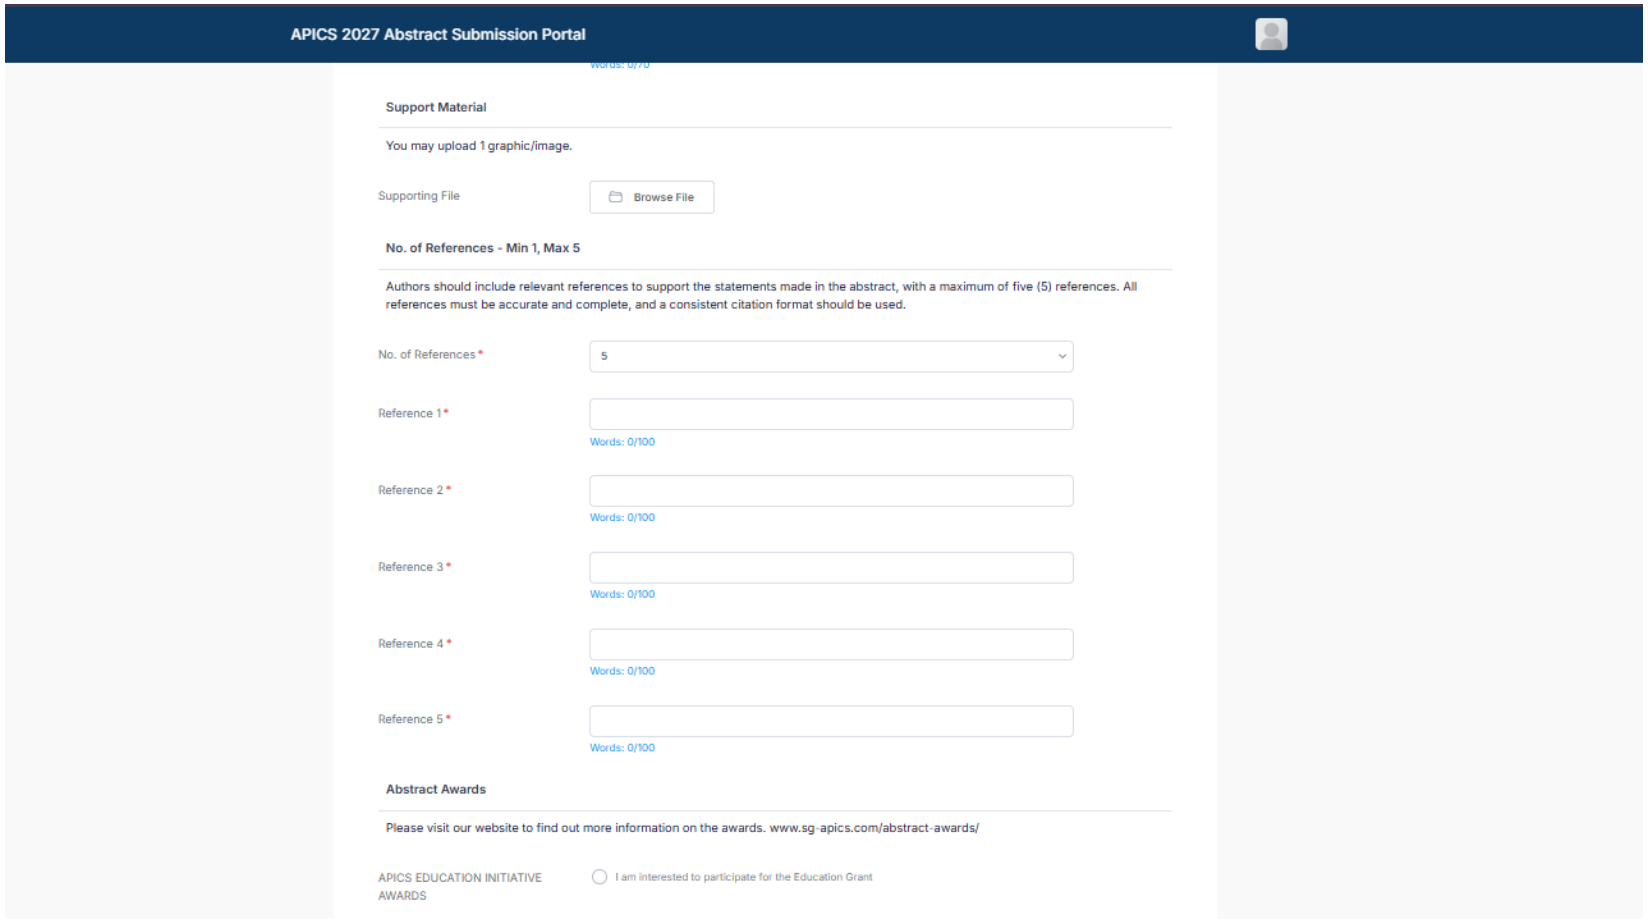
*Under the **Abstract Information** section, submitters can select the preferred topic from the dropdown menu and enter the abstract content according to the structured fields shown in the screenshot on the left.*

*The **abstract title is limited to 25 words**, while the **total abstract content is limited to 300 words** across all fields.*

*Submitters may also **upload one (1) graphic or image** to accompany the abstract submission.*

Should submitters require a higher word allowance for a particular field, the Abstract Management Team would be happy to assist with manual adjustments in the backend on a case-by-case basis.

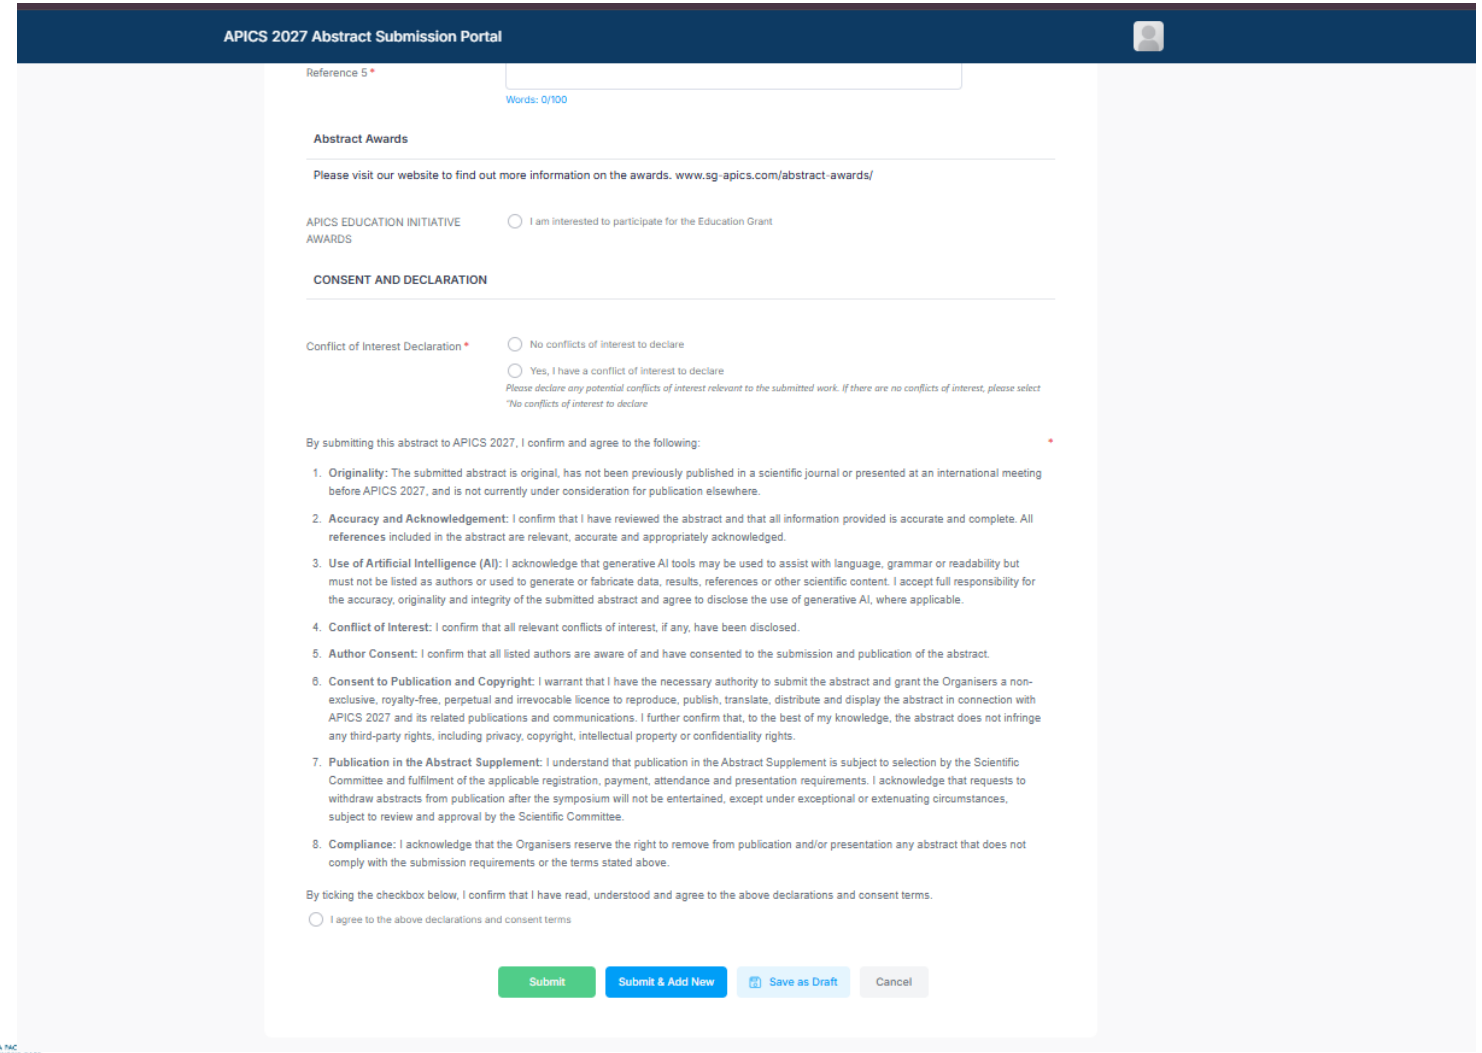
Submitting the Abstract Information



*Submitters may **upload one (1) graphic or image** to accompany the abstract submission and include **up to five (5) references**.*

*Additionally, you can indicate whether you wish to participate in the **APICS Education Initiative Awards**.*

Consent, Declaration & Final Submission



*Under the **Consent and Declaration** section, submitters are required to declare any potential **Conflicts of Interest** and acknowledge the submission terms and conditions.*

These include confirmation of the abstract's originality, accuracy, appropriate use of AI, author consent, publication rights and compliance with APICS 2027 submission requirements.

*Submitters must **tick the consent checkbox** to confirm agreement before proceeding with the submission.*

*Once all required fields have been completed, submitters may choose to **Submit** the abstract, **Submit and Add New Entry**, or **Save as Draft** to return and complete the submission at a later stage via the portal.*

*Upon successful submission, submitters will also receive an **automated confirmation email** acknowledging receipt of the abstract.*
